The index is two parts. Part one is the typical index of biblical citations, arranged in the order of the books of the Bible. This index includes citations included in the numerous reports made to synod by agencies, assemblies, and commissions. It does not include citations in reprinted reference and informational sources submitted in the overtures.

Part two is the subject index. The major report divisions are included, as are all names mentioned in the many reports, including those listed as submitting the report or listed as members of a body in the report. Not included are the names of delegates, nominees appointed to bodies, or members of bodies listed in the front pages of the minutes. The Book of Church Order (BCO) citations index the various citations of the BCO throughout the reports and actions.

The desire is to provide access to the vast range of information available in the minutes in an efficient manner. Your comments on the accessibility of this style and suggestions for future improvements will be appreciated.
